

OPPORTUNITY LITE FLEXIBILITY IN THE DENTAL CLINIC

With the innovative mechanism that moves together the chair and the unit, allows you to approach easily with any clinical treatment, surgery conservative than prosthetic till the more complex implantology.

Opportunity Lite is a dental unit that combines the highest level of building traditions with a modern minimalist design.

Opportunity Lite is a dental unit designed to ensure the productivity of any professional in the dental field and is built with the most innovative components, assembled and tested by our technicians one by one. Equipped with diagnostic and a display that shows the error codes, so to provide targeted and fast assistance.

Hygiene Devices

Copega Dental unit offer different systems to ensure the disinfection:

VITRA SPRAY: complete disinfection system (water circuit, spray and suction tubes) using specific liquid per cycle at the end of the day.

SIC LIGHT: full continuous disinfection system.

SCI continuous disinfection system with circuit breaker (see EN 1717 standards).

Cuspidor

The glass or ceramic cuspidor can be fixed or mobile; Choose from many colors for a touch of vitality to your dental unit. The cuspidor is removable for a complete cleaning.

Working positions

The Opportunity Lite is designed to offer maximum freedom for medical staff in every clinical situation.

Board

The mechanics of the instrument is designed to increase maneuverability and eliminate the tension exerted on the wrist of the doctor for total comfort. As an alternative, the tablet may be produced with hanging hoses. The instruments, while remaining out of sight of the patient, help to create a more relaxed atmosphere.

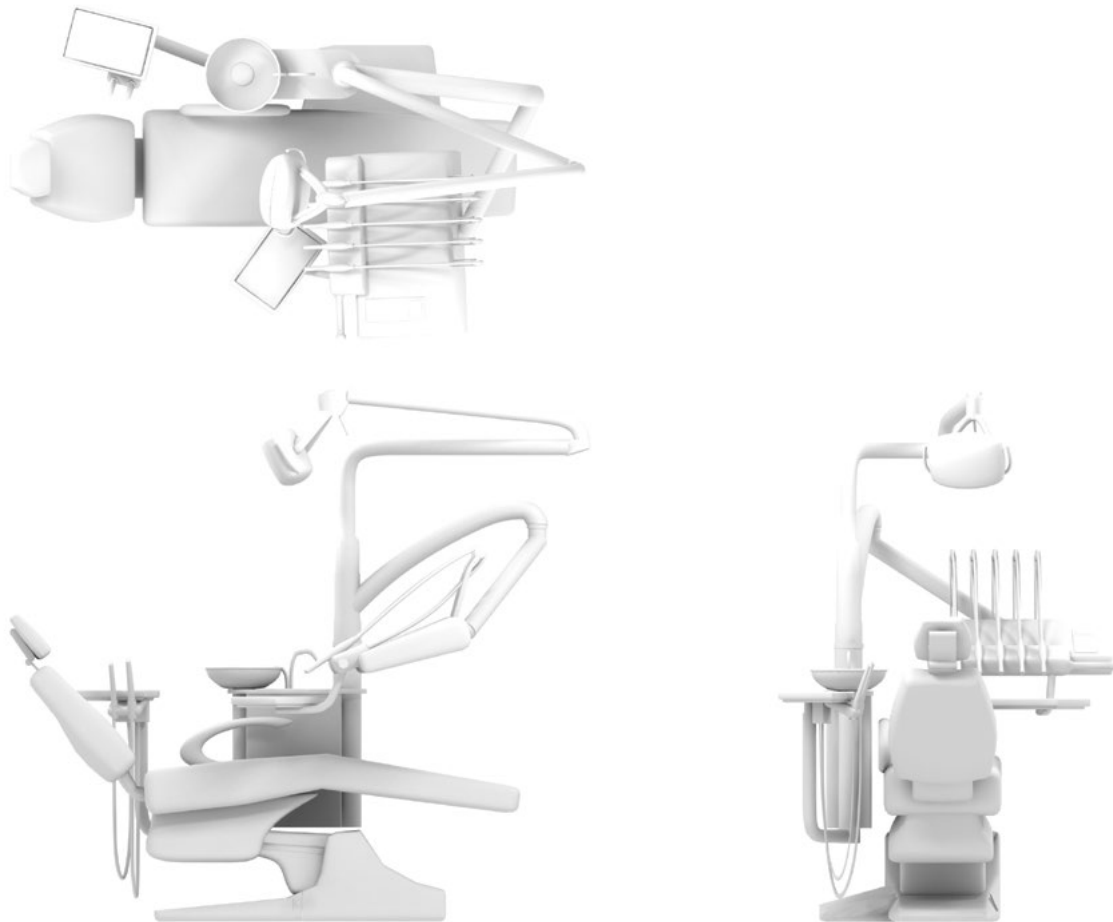

Lamps

There are three models of lamps combined with this meeting: the halogen lamp from 25,000 lux to 35,000 lux LED lamp or 50,000 lux. The LED lamps are equipped with 3-axis rotation for optimum viewing of the patient's mouth.

Sky

Completes the design of your studio selecting the most appropriate leather color.
